Slow No Wake Order for Lake Waubesa Removed

Order Remains in Effect for Crystal Lake

Water levels on Lake Waubesa have fallen and remained below the threshold prescribed by the slow no wake order approved on June 27th.

The weather forecast looks very favorable for lake levels to continue to decline in the coming days.

In light of that, the slow no wake order on Waubesa was removed today (Wednesday, July 10th).

The Slow/No Wake Order for Crystal Lake will remain in effect indefinitely.
